

# nowhere to go but everywhere

INSTRUCTION ON HOW TO WALK THE OLD MILL 0.8 MILES TRAIL

What is it like to re-describe a landscape and personal experience by going back in time?

What is it like to walk re-imagining a different season or a childhood home—memories of places, things, people lingering still in the Fall leaves, in each of the trail marks attached to a tree?

What happens in the body and mind when perception is shift through visual displacement and sound?

What is it like to approach walking as a meditative understanding of human consciousness concerning the human experience?

# nowhere to go but everywhere
